ICE Model

Spiro are the new revolutionary TACENS fans with aerodynamically designed blades and specific cuts that effectively reduce air resistance to reduce noise generated to unprecedented levels at that fan speed and airflow specs.

Spiro fans includes the new exclusive TACENS Fluxus PRO II bearing for Ultra-long life of more than 100,000 hrs of extremely silence operation thanks to its permanent and full lubrication.

Its new mini-motor hub allows longer blades than normal fans for extended airflow performance with lower noise level.

Spiro comes in a professional package including high-quality rubber anti-vibration screws, 3-4pin adaptor and a special Noise-RPM reduction cable for an ultra-quiet operation of just 8dB.

The Spiro ICE model also includes four TACENS white LEDs for a COOL lighting effect for modding or gaming configurations that will make computer stand-out from the rest.

- Revolutionary airplane-wing designed blades reduces the air resistance for unprecedented silent operation.
- New mini-motor hub for extended airflow performance
- Exclusive new Fluxus PRO II bearing for ultra-long life and silent operation
- Professional anti-vibration screws, 3-4pin adaptor and Noise-RPM reduction cable included
- Ultra-silent: 8dB-14dB and big airflow: 43CFM-70CFM
- Four white LEDs for COOL lighting effect (ICE model)

Rated Voltage:	12VDC
Starting Voltage:	≤ 9.0V
Power Consumption:	1.08 - 1.56W
Rated Current:	0.09A - 0.13A
Speed:	1000 -1500 RPM±10%

Air Flow:	43 - 70 CFM
Air Pressure:	0.93 -1.4mm-H2O
Noise:	8 dBA -14dBA
Weight:	111.9g
